№:

Dear ladies and gentlemen!

On behalf of the Ministry of the industry and new technologies of the Republic of Kazakhstan let me invite you to the II International mining-metallurgical Congress «ASTANA MINING & METALLURGY-2011»!

At the first year of its conducting the "AMM-2010" Congress has already consolidated the status of the reputable industry event directed on increasing of global competitiveness and investment attractiveness of mining and metallurgical sector. The Congress is an embodiment of the central platform of effective cooperation of the state, business and a science.

As it was mentioned by the President of the Republic of Kazakhstan Mr. Nursultan Nazarbayev during his address at the I "AMM" Congress: «The future of the mining and metallurgical sector of Kazakhstan depends on ability of all participants to transformation, openness to innovations, and flexibility in decision-making».

Kazakhstan currently is the country with swift developing economy which stands at an important stage of transition (transformation) from a raw oriented to processing industry. One of the important roles in this process belongs to mining and metallurgical complex. A rational usage of sources of raw materials, development of new resources, increasing of power efficiency and ecological compatibility of production, output of hi-tech product – are the guarantee of sector's successful development.

I'm confident that "AMM-2011" Congress will become a platform of effective dialogue between the state, scientific and business structures, and once again will promote the generation of innovative ideas and the technologies, new opportunities and a mutually advantageous exchange of experience, which will find wide practical application.

Asset ISEKESHEV,

***The Deputy Prime-Minister -
The Minister of industry and new technologies
of the Republic of Kazakhstan***
